GCCS 2.2 SEGMENT RELEASE BULLETIN

EM Patch   Version: 6.0.6   Date: 08/08/97   (EMPTH)   HP-UX 9.07

Segment Description

The EM Patch provides patches to Executive Manager version 2.1.5.02 on an HP computer running HP-UX 9.07.

Fixes & New Features

1. The X Display Monitor (xdm) was modified to turn on the HP Audit Session.
2. The X Print Control Program (xpcp) was modified to display a maximum of 500 printer in the System -> Select Printer option.
3. The Session Manager "Select Printer" option will now install a printer the first time it is selected.
4. The System Monitor application will now allow system alarm broadcasts to all EM session manager Sun and HP clients.

Known Problems

1. When a new printer is created through print manager, the user must log off and back on for the printer to appear in the Select Printer list.
2. The Session Manager Stop Programs pull down window will list applications that had previously been exited since the current login session.

Installation Instructions

    Step 1:   Verify installation of required segments:
              Exec Mgr 2.1.5.02
              EM Printer Admin 2.3.3 or greater.

    Step 2:   Install EM Patch 6.0.6

Post Installation or Configuration Instructions

Reboot.

The xdm audit requires auditing be turned on in the /etc/auditrc file. Activate the audevent with login. For example:

    /usr/bin/audevent -P -F -e login

For the local workstation to display more than 250 printers (up to 500 printers) in the desktop System -> Select Printer, the following software (or later versions) must be installed on all workstations:

HP	EM Patch 6.0.6	8/8/97
HP	EM Printer Admin 2.3.3	3/24/97
Solaris	EM Patch 6.0.2.01	4/10/97
Solaris	EM Printer Admin 2.3.2.03	6/10/97
